Subject: Hunters Point Naval Shipyard - dust management plan for radiological rework
Attachments: DTSC Comments Hunters Point NSY_Draft Final Parcel G Removal Site Evaluation WP_12.14.2018.pdf; 2019-4-17 Hunters Pt Parcel G Rad Rework App E Dust Mgmt Plan.pdf

Dear Kevin, John, and Joshua,

I hope you are well. As you may know, data fraud by Navy contractor Tetra Tech EC Inc. has caused the Navy to need to redo radiological testing and, if needed, cleanup work at the Hunters Point Naval Shipyard. This issue has received a great deal of public interest. FYI, today, the Navy sent us its draft dust management plan associated with this work. The Navy has requested comments from EPA, DTSC, and CDPH by May 31, but we are trying to expedite our comments. Attached are recommendations that DTSC sent to the Navy before it drafted the attached plan. I thought you would want to know.

I am cc'ing Maeve Clancy because she is our lead staff person on air/dust issues at this site.

Lily
